

DEPARTMENT OF ENERGY
Memorandum

DATE: 14 April 2014

REPLY TO
ATTN OF: NA-30

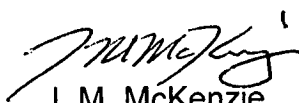

SUBJECT: NAVAL REACTORS FY 2014 NATIONAL ENVIRONMENTAL POLICY ACT (NEPA)
PLANNING SUMMARY; AMENDED

TO: Anne Harkavy, Acting General Counsel

Attached please find the amended 2014 Annual National Environmental Policy Act (NEPA) Planning Summary for Naval Reactors (NR). This is in accordance with the Department of Energy (DOE) Order 451.1B, Section 4.d. The attached summary includes DOE Environmental Assessments (EAs) and Environmental Impact Statements (EISs) only and does not include Department of Navy NEPA documentation.

At the end of January, 2014, when the NEPA Annual Planning Summary was due, NR had not determined the impact of the January 17, 2014, consolidated FY 2014 appropriations law on EIS 0453 publication and public hearing dates. NR reported the EIS dates as "TBD" pending a decision. While the recapitalization of infrastructure supporting naval spent nuclear fuel handling at the Idaho National Laboratory will be delayed as a result of FY 2014 funding, the President's FY 2015 budget request supports the project in FY 2015 and NR has decided to move forward with publication of the draft EIS. This amended NEPA Planning Summary reflects expected dates for the publication of EIS 0453.

If you have any questions or need additional information, please contact Amanda Stuhldreher, NR DOE NEPA Compliance Officer at (202)781-6368.

J. M. McKenzie
